

# PRINCE2®

## Get a firm grip on projects using PRINCE2

### Why choose this EXIN qualification?

- EXIN is the global leader in certifying ICT professionals
- Manage changes and potential problems within a project. You will make projects successful, and ultimately save money and effort
- Many companies across the world require staff to be PRINCE2 certified
- You will make fewer mistakes, learn from those that you do make, and ultimately save money and effort

### Benefits for organizations

- Clear roles and responsibilities, with everyone speaking the same language
- PRINCE2 is a tried and trusted method, a Best management Practice
- PRINCE2 is flexible and can be applied to any kind of project in any type of organization
- Management has control of any business and project risks and deviations
- Your customer will value your business more, which means higher levels of customer satisfaction

**“PRINCE2 provides organizations and professionals with a greater control of resources, risks and planning of any project.”**

Companies and organizations often have difficulty organizing projects efficiently, resulting in increased costs, delays and failures. The time constraints, risks and complexity of many projects puts pressure on project managers and team members. PRINCE2 (Projects in Controlled Environments) the default standard for project management, is the solution to take projects to a higher level.

### Successful projects at lower cost

PRINCE2 is a method to organize and execute projects in a structured manner. This Best Management Practice can be used for any project regardless of size, type, business or organizational background of the members in the project team.

Seven principles are applied within a PRINCE2 project and seven themes that must be addressed continually and in parallel throughout the project:

- **Business case:** the heart of each PRINCE2 project. The objective is to establish mechanisms to judge whether the project is and remains desirable, viable and achievable.
- **Organization:** to define and establish the project's structure of accountability and responsibilities.
- **Quality:** to define and implement the means by which the project will create and verify products that are fit-for-purpose.
- **Planning:** facilitating communication and control by defining the means of delivering the products.
- **Risk:** to identify, assess and control uncertainty and improve the ability of the project to succeed.
- **Change:** to identify, assess and control any potential and approved changes to the base-lined objectives
- **Progress:** to establish mechanisms to monitor and evaluate actual achievements with the planned achievements in order to provide a forecast for the project objectives.

### Better prospects for professional and organization

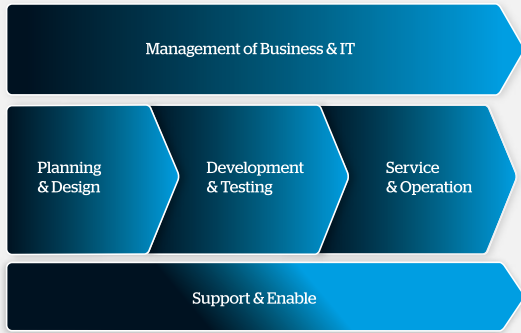

A PRINCE2 certificate from EXIN proves the professional has the required skills, knowledge and competence to successfully manage projects. That's why more and more companies around the world demand project managers who have a PRINCE2 certificate. An EXIN certificate for PRINCE2 takes the skills of professionals to a higher level, thereby strengthening the organization he or she works for.

### Target group

Organizations that want their projects to be managed in a more efficient and effective way should embrace PRINCE2. It is the best method for both ICT and non-ICT related projects, as PRINCE2 can be applied to any type and size of project. PRINCE2 is suitable not only for those managing projects, but also for all staff participating in projects, to ensure that all those involved in a project have the same understanding of what is required.

***PRINCE2 is recognized internationally  
as a standard for effective project management,  
based on best practices. EXIN is your PRINCE2 Partner***

## EXIN: 30 years of experience in certifying the competences of ICT professionals

EXIN is the global independent certification institute for ICT professionals. With 30 years of experience in certifying the competences of 2+ million professionals worldwide, EXIN is the leading and trusted authority in the ICT-market. EXIN offers an extensive portfolio of exams, catering to the need of ICT professionals looking to prove their knowledge and skills through certification. With over a 1.000 accredited partners EXIN facilitates certifications and assessments in more than 125 countries and 20 languages.

### EXIN's vision on the Best Management Practice Portfolio (BMP)

EXIN offers you both IT Service Management (ITIL®) and the Portfolio Programme & Project Management (PPM Suite). The diagram shows how the various subjects and qualifications within the BMP Portfolio can be structured and related. On the one hand the guidance for IT Service Management, on the other hand for Portfolio, Programme & Project Management with their associated subjects, also called the PPM suite. Both ITIL and PPM are process based approaches, which makes the PPM products particularly suitable for managing IT Service Management related projects and programs.

### EXIN, the most recognized examination institute worldwide for ICT professionals

- Extensive portfolio of exams
- Exams in more than 125 countries
- Exams in more than 20 languages
- 2+ million professionals are EXIN-certified
- International network of accredited partners

### Portfolio, Programme & Project Management Suite

The content is defined in six programs. They are interrelated and share concepts and models, but also can be used separately. The guidance on Project Management in PRINCE2®, Programme Management in MSP® and Portfolio Management in MoP® can be considered as the core of the PPM suite. The guidance on Risk Management in M\_o\_R®, Value Management in MoV® and Portfolio, Programme and Project Offices in P3O® fosters and supports the quality and benefits of Portfolio, Programme and Project Management from three different perspectives.

ITIL®, PRINCE2®, MSP®, M\_o\_R®, MoP®, MoV®, P3O® and P3M3® are Registered Trade Marks of AXELOS Limited. The Swirl logo™ is a trade mark of AXELOS Limited.
